**Information on the data processing that has the most impact on the Data Subject:**

Recordings are stored in a password protected file of the Library's computer for 72 hours (or until the end of the first working day following longer closures) after which they are deleted automatically. The recordings will not be used for surveillance of people's activity. In case of damage, the video footages are merely reviewed by one of the 3 authorized library staff members. The footage that contains the incident is stored by Data Controller until the end of the procedure(s) initiated in order to establish liability. The Data Controller shall disclose the footage to the authorized University of Pécs departments or law enforcement agencies.

**Video Surveillance is intended for:**

Video surveillance of the library unit's cloakroom area for asset protection purposes.

**Data Subject's Rights:**

As a Data Subject you have several rights to exercise, in particular the right to request from the Controller access to or erasure of your personal data. For details on this video surveillance including your rights, see the full information provided by the Controller through the options presented on the left.
